

RESOLUTIONS

THE IV INTERNATIONAL SCIENTIFIC AND TECHNICAL CONFERENCE "METROLOGY OF PHYSICOCHEMICAL MEASUREMENTS"

17-19 September 2019, Suzdal, Russia

1. The IV International Scientific and Technical Conference "Metrology of Physicochemical Measurements", which held on September 17-19 (2021) in Suzdal (Russia), brought together about 100 participants from 50 organizations from 6 countries and stated that its topics were aimed at solving topical issues of metrological support in the field of physical and chemical measurements.
2. The participants noted the high scientific and organizational level of the Conference, and a wide scope of topics and geography of participants. Representatives of metrological institutes and regional metrological centers of Russia, Switzerland, Bulgaria, Germany, Israel, China, Belarus, representatives of Roszdravnadzor and Mosecomonitoring, manufacturers of measuring instruments, etc., took part in it.
3. Interesting proposals were made to improve the level and quality of the metrological work and topical problems in that area were highlighted in the Conference, as well as a small thematic exhibition was organized.
4. The Conference recommends publishing the Conference Proceedings at a publishing house indexed in Scopus, after approve by the Program Committee and reviewed by the reviewers.
5. The participants noted the high importance of the event for metrological practice, communication and exchange of experience, and recommend organizing another such Conference in 2021.
6. The Conference notes the high level of the presentations and thanks everyone for agreeing to take part in the Conference.
